

# VMware View Jumpstart Bundle

## Overview

For IT groups considering a virtual desktop environment or in the early stages of a VMware® View™ implementation, this combination of two popular workshops offers a proof-of-concept that serves all major IT stakeholders in five days. The Jumpstart makes the best use of time by presenting on different days content tailored for individual teams, including server, desktop, applications and help desk teams. The week culminates with an on-site proof-of-concept that unites the technology and interests of all.

VMware View enables companies to provide end-users with operating systems, business applications and productivity tools centrally from data centers. This results in overall end-user satisfaction and improved data security while reducing administrative costs. In this workshop we provide knowledge transfer on VMware View in conjunction with a demonstration of VMware View Manager and VMware ThinApp™. Participants will learn how to efficiently create, provision and manage virtual desktops in a proof-of-concept setting.

## Workshop Activities

TEAMS	TOPICS
Server (2-days)	<ul style="list-style-type: none"> <li>VMware ESX™ and VirtualCenter installation and management</li> <li>Server build for VMware View Manager, DMZ configuration and ports</li> <li>VMware ThinApp, including application packaging and distribution</li> <li>Sizing considerations for networked, servers, and storage</li> </ul>
Desktop (1-day)	Creating desktop pools and managing the end-user experience, including application delivery
Applications & Help Desk (1-day)	<ul style="list-style-type: none"> <li>VMware View Manager pool concepts</li> <li>End-user perspective</li> <li>Application packaging distribution and management</li> </ul>
All (1-day)	Completion of VMware View installation with a solution perspective

### AT A GLANCE

The VMware View Jumpstart Bundle provides knowledge transfer and an on-site proof-of-concept that reaches all key major IT stakeholders in five days.

### BENEFITS

- Unifies cross-functional teams by addressing concerns of all IT stakeholders
- Staff efficiency when prototyping a virtual desktop environment
- Speeds time-to-implementation with knowledge transfer of proven best practices by experienced consultants

### COMPONENTS

- VMware View Jumpstart
- VMware ThinApp Jumpstart Add-on

## Pricing and Scope

- Up to five (5) days on-site
- Concurrent purchase of VMware View Jumpstart (CON-ESXVC-VDM-JS) and VMware ThinApp Jumpstart Add-on (CON-THIN-JS-ADD)
- Maximum of five (5) participants in each session
- Up to two (2) ThinApp Capture workstations and three (3) packaged applications
- Jumpstart delivered by a VMware Certified Professional (VCP) from VMware or from a VMware Authorized Consultant
- Contact your local VMware representative for pricing

## Customer Requirements

- VMware ESX and supporting hardware and operating system environment
- Minimum 6GB of local space free, support for NAS, iSCSI or SAN storage
- Supported VMware ThinApp Application Capturing workstations (VMware Workstation 5.5 or higher)
- Three sample applications, with installation media and licenses, for application virtualization demonstration
- Conference room with projector and network-connected desktops/laptops running MS Windows® XP
