

# VMware Infrastructure with Lab Manager Jumpstart

## Overview

Customers and partners of VMware® Infrastructure can learn more about its use for software development, testing, and support. This jumpstart provides knowledge transfer on VMware Infrastructure in conjunction with a demonstration of VMware Lab Manager. Participants will learn how to improve productivity, consistency, and speed of the software development and testing cycle through virtualization.

## Deliverables

- Interactive proof-of-concept workshop on VMware Infrastructure and its use for software development and testing
- Guided tour of VMware Infrastructure and VMware Lab Manager capabilities
- Installation and configuration of a standard installation
- Best practices guidance on setup and operations of VMware Infrastructure for software test labs

## Target Audience

Customers and partners of VMware Infrastructure, who want the benefits of virtualization for the software development and test cycle. Companies whose core business is software development, those who provide development and testing and consulting services, and IT groups involved in software development and testing are part of this audience. Development, quality assurance, production operations, and IT staff responsible for system architecture, storage, network, servers and services management will be interested in this offering.
