

VMware Infrastructure with VMware View Manager Jumpstart

Overview

Customers new to VMware® Infrastructure can learn more about its use in creating and managing virtual desktops. Virtual desktops enable companies to provide end-users with operating systems, business applications and productivity tools centrally from data centers. This increases overall end-user satisfaction and improves data security while reducing administrative costs. In this workshop we provide knowledge transfer on VMware Infrastructure in conjunction with a demonstration of VMware View™ Manager. Participants learn how to efficiently create, provision and manage virtual desktops in a proof-of-concept setting.

Deliverables

- An interactive proof-of-concept workshop that provides knowledge transfer on VMware infrastructure and its use for structuring and deploying virtual desktops
- Best practices guidance on installation, configuration, and management of components used for VMware View
- Proof-of-concept environment installed and configured

Target Audience

Customers new to VMware Infrastructure who want the benefits of virtual desktops. Companies that want to improve end-user productivity while reducing costs of administering physical desktops will be interested in this offering.

Roles and Responsibilities

- VMware Certified Professional Consultant: Conducts workshop, provides best practices and knowledge transfer about configuration and management of VMware Infrastructure and VMware View Manager
- Workshop Participants: IT staff responsible for end-user support, desktop resources, architecture, storage, network, servers and services management

Professional Services Best Practices

Benefits
