

VMware Consolidated Backup Jumpstart Add-on

Overview

The VMware® Consolidated Backup (VCB) Jumpstart Add-on helps you understand business continuity issues with respect to VMware Infrastructure and explore various strategies to increase availability and shorten response times when faced with service disruptions and disasters.

This one-day consulting engagement is designed to be ordered and delivered with the VMware Infrastructure Jumpstart, the VMware Upgrade Workshop or the VMware Infrastructure with Physical-to-Virtual Jumpstart. These jumpstarts, together with the VCB Add-on, speed your time-to-market while maximizing your time and dollars.

Deliverables

- Interactive, proof-of-concept, disaster recovery workshop using VMware Infrastructure
- Best practices knowledge transfer
- Demonstration of backup and recovery of a virtual machine using VMware Consolidated Backup

Target Audience

Architects and administrators new to VMware Infrastructure who are interested in maximum uptime and risk reduction in event of a service disruption or disaster

Roles and Responsibilities

- VMware Certified Professional Consultant: Conducts workshop, which includes installation, configuration, administration and ongoing infrastructure management best practices
- Customer Project Manager: Plans and coordinates all jumpstart-related IT functions
- Customer Systems Administrator: Responsible for server hardware, storage, and networking
- Customer Server Administrator: Responsible for operating system and applications

Key Activities
